EDUCATION

Indian Institute of Information Technology Raichur - B.Tech in CSE, CGPA: 8.41/10 **2022 – Present**
Green Valley High School - Intermediate: 92% **2021 – 2022**

SKILLS AND TOOLS

Programming & Frameworks: Python, C++, JavaScript, Flask, Django, React.js
Machine Learning & Deep Learning: Supervised & Unsupervised Learning, Feature Engineering, Model Evaluation, Cross-Validation, Time Series Forecasting, PyTorch, TensorFlow
NLP & LLMs: Transformers, Embeddings, Prompt Engineering, RAG, N8N, LangChain, LLM Application Development
ML Engineering & MLOps: Data Pipelines, Experiment Tracking, Model Optimization (Quantization, Pruning), FAISS (Vector Search), Model Deployment (APIs)
Data & Visualization: Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Google Earth Engine
Tools & Platforms: Git, GitHub, VS Code, Ollama

WORK EXPERIENCE

AI Intern **March 2026 – Present**
Darwix AI

- Developing LLM-based applications using RAG and vector search.
- Building AI-driven automation workflows using agents for task optimization and scalability.

Research Intern **May 2025 - Nov 2025**
Wadhvani School of Data Science and AI, IIT Madras [certificate]

- Designed a scalable visual place recognition pipeline using PyTorch and deep learning feature extraction.
- Implemented FAISS-based vector search enabling efficient large-scale image retrieval.

Head of Corporate Relations in T&P Cell **Jan 2025 – Present**
IIT Raichur

- Led corporate outreach and built partnerships to enhance placement and internship opportunities.
- Coordinated hiring drives, hackathons, and institute-industry events ensuring smooth execution.

PROJECTS

Empathy Engine (AI Agent System) | LLMs, RAG, Automation **March 2026**

- Built an AI agent system leveraging LLMs and Retrieval-Augmented Generation (RAG) for context-aware responses.
- Designed pipelines integrating embeddings, vector search, and prompt engineering for improved response quality.
- Developed automation workflows to handle dynamic tasks using AI agents and scalable backend logic.

Visual Place Recognition Pipeline | PyTorch, FAISS, Deep Learning **May–Nov 2025**

- Designed a scalable visual place recognition pipeline using deep learning feature extraction techniques.
- Integrated FAISS-based vector search for efficient large-scale image retrieval.
- Optimized inference performance using model pruning and quantization techniques.

Reddit Persona Generator | Application | Python, LLMs, Ollama **Aug–Oct 2025**

- Built a data pipeline to scrape and structure Reddit user activity using PRAW.
- Developed LLM-based persona generation using embeddings and prompt engineering techniques.
- Deployed an application to generate evidence-backed persona profiles from user-generated content.

CERTIFICATIONS & ACHIEVEMENTS

- Kaggle's 5-Day Generative AI Intensive Course with Google. [certificate] [Blog] Apr 2025
- First Runner-up in Luminous Techno-X hackathon 2024 [certificate] Dec 2024
- Teaching Assistant – Software Engineering, Mathematics [SE] [Maths] Jun-Dec 2024
